

WOLF Machine Add-On Revision — July 2025

This document is an official add-on and revision to the original WOLF Machine Whitepaper, updating key details and system architecture—including the switch to “WOLF” in all references and the addition of WOLF Wallets. See both for complete coverage.

About: *September Wolf is a pioneering music NFT artist dedicated to creative freedom and web3. SWM SeptemberWolfMusic.com is a high-vibe community space for authentic connection, blockchain education, and decentralized music—all powered by love.*

What is WOLF Machine?

WOLF Machine is a first-of-its-kind, fully autonomous NFT minting system purpose-built for music distribution—designed to restore the authenticity and traceability lost in the shift from physical to digital.

Born out of necessity and built from scratch by music NFT artist **September Wolf** on the Solana blockchain, WOLF Machine solves a problem no one else has:

Just as the CD barcode once ensured every edition was real and trackable, WOLF Machine brings that same integrity to digital music—with technology built to scale and last.

Every NFT is issued in strict sequence, permanently recorded, and instantly delivered—creating a digital barcode for every edition, impossible to fake, duplicate, or erase. **Secure, direct minting that sets a new standard for digital music distribution.**

What WOLF Machine Does:

- **Custom smart contract with strict, sequential minting:** Every edition is numbered and logged—no randomness or duplicates.
 - **On-chain, immutable records:** Sale and ownership are permanent and transparent—no edits, fakes, or overwrites.
 - **Fully autonomous, ‘set and forget’ workflow:** No third-party platform dependencies, no APIs, no single points of failure.
 - **Built-in wallet onboarding:** Create a “WOLF Wallet” or connect your own; supports both fiat and SOL payments.
 - **Instant, automated delivery:** NFT holders receive unlockable content and confirmation email immediately.
-

Batch System & Value Structure:

NFTs are valued by **Edition Number** within and between batches and released as follows:

- **Batch 01:** 10,000 editions (*most scarce, highest value*)
- **Batch 02:** 100,000 editions
- **Batch 03:** 500,000 editions
- **Batch 04:** 1,000,000+ editions (*open-ended, most accessible, lowest price*)

Each music NFT’s title includes its batch and edition number, for example: **B01 #XXXX/10000**. This title is permanent and instantly visible—no need to check on-chain or look up metadata to see or prove what you own.

This batch structure not only creates scarcity and clear provenance for holders, but also ensures every music NFT follows the same transparent standard. **Lower numbers and earlier batches are always the most scarce and valuable, just like first pressings or original barcodes in physical music.**

What are WOLF Wallets – Cold Wallet Security, Hot Wallet Freedom

WOLF Wallets are next-generation, Solana-based cold wallets, generated 100% offline. The security philosophy is simple: **your keys, your control, you're in charge**. WOLF Machine generates each wallet using unbreakable, multi-layered security scrambling—only the holder ever sees or saves the seed phrase. **Not even WOLF Machine can access your wallet, only you.**

Unlike logging into unknown platforms that track you and store your data, WOLF Wallets have never been online and never need to be migrated. **Use the WOLF Wallet Portal to view your NFTs and SOL balance, or send either instantly.**

To receive, just share your WOLF Wallet address (**never your seed phrase**)—then return to the Portal anytime to see your updated balance and NFTs.

Breaking new ground, WOLF Wallets function as both true cold and hot wallets—offering full send and receive capability instantly, without hardware, browser extensions, or any Web2 limitations. WOLF Wallets work in any browser, on desktop or mobile—no extensions or apps needed. **True web3, decentralized freedom.**

Licensing: WOLF Machine

WOLF Machine – System will be developed into a robust template and blueprint for Music NFT minting, tracking, and distribution. Fully transparent and autonomous, WOLF Machine was built entirely by an artist for artists, and will be made available and licensed as NFTs to major & indie labels, artists, and publishing companies to restore the true authentic value of music & music ownership.

WOLF Machine is the digital barcode for a new era of music—reclaiming ownership, distribution, integrity, and control.

Fully autonomous. LFG 🚀
