Nagpur will host the launch of *Nayi Raho Pe*, the debut music album by 16-year-old singer and composer Surmayee Sathe. The event is scheduled to take place later this week, with Amruta Fadnavis, banker and singer, attending as the chief guest.

The album features a collection of original songs composed and performed by Surmayee, blending contemporary melodies with lyrical themes that aim to connect with a wide

audience. According to event organisers, the project has been a collaborative effort involving musicians and sound engineers from Nagpur, highlighting the city's growing presence in India's independent music scene.

Surmayee began her musical journey at an early age, participating in local and regional competitions before moving on to larger platforms. She has trained in both classical and contemporary music styles, a combination reflected in the arrangements and vocal delivery of her debut work. Organisers say that her versatility and willingness to experiment with different genres helped shape *Nayi Raho Pe* into a diverse listening experience.

The launch event will include live performances from the album, giving attendees a first-hand experience of the new material. It is expected to draw an audience that includes members of the local arts community, educators, and music enthusiasts. The presence of Amruta Fadnavis is seen by organisers as a boost to the event's profile, given her career in music alongside her professional role in banking.

Speaking ahead of the release, Surmayee expressed gratitude to her mentors, peers, and family members who supported her during the album's production. She described the project as the result of years of practice, experimentation, and learning. Her goal, she said, is to inspire other young artists to pursue their creative ambitions regardless of challenges.

The album's production was managed by a Nagpur-based team, with recording sessions taking place over several months. Technical staff focused on maintaining a high production quality while still allowing the raw and expressive nature of the performances to come through. Tracks from the album will be available on major streaming platforms following the official launch.

For Nagpur's music community, the release of *Nayi Raho Pe* represents another example of young talent emerging from the city and contributing to India's broader independent music movement. While Surmayee is at the start of her career, industry observers believe her commitment to original composition and performance marks her as a promising voice in the country's cultural landscape.
