## A New Standard for Urban Development: Inside the 16 Sina Islamabad Project

July 28, 2025

– Categories: Real Estate

Situated in Islamabad’s expanding Blue Area, the 16 Sina Tower is a 32-story mixed-use development aiming to raise the bar in luxury living, office spaces, and commercial infrastructure. Backed by Mujahid Properties, this privately-led project showcases high-end urban construction, a contrast to slower-moving public developments in the region.

Islamabad’s skyline is evolving, and 16 Sina is part of that change. Located between Ibn-e-Sina Road and Jinnah Avenue within proximity of the Blue Area and Faisal Mosque, this 32-

floor, 28,000-square-foot structure offers more than just a modern design. It symbolizes a shift toward integrated and efficient urban growth. With panoramic views of F-9 Park and the Margalla Hills, the location provides both accessibility and scenic appeal.

Mujahid Properties (MP), the developer, is known for its contributions to Pakistan's real estate sector. The firm has positioned 16 Sina as a flagship project. Najmi Bilgrami Collaborative Limited (NBCL) is overseeing the architectural design, while Arif Hussain Associates handles structural work, ensuring the development meets safety and quality benchmarks.

The project's theme, "Rethinking Lifestyle," promotes an all-in-one model residential, commercial, and office space aimed at reducing congestion and urban sprawl. This trend aligns with global urban development standards and introduces efficiency in land use and mobility planning.

One of the standout features of 16 Sina is its private sector leadership. In contrast to common delays in public sector housing initiatives, 16 Sina's progress illustrates what can be achieved under professional management and clear timelines.

With a projected completion timeline of four years, the development is being closely watched as a test case for future urban planning in the capital. If executed as planned, 16 Sina could offer a replicable model for modern, self-contained city living.
